

BEML PUTS UP A BIG SHOW IN THE EXCON

BEML LIMITED, the public sector giant and a premier manufacturer of earthmoving and construction equipment for four decades is participating in the EXCON-2009, the 5th International Construction Equipment and Construction Technology Trade Fair being held at Bangalore International Exhibition Centre from 25th to 29th November 2009.

BEML, the brand name known for the world-class Mining and Construction Equipment, is the manufacturer of various heavy engineering equipment for mining and construction sector. This includes High End Dumpers, Dozers, Excavators, Walking Draglines, Rope Shovels, Motor Graders, Water Sprinklers etc. With its state-of-the-art R&D facility, the company has been continuously updating its technology and developing different types of equipment required in the contract segments which includes Wheel Loaders, Backhoe Loaders, Hydraulic Excavators, Dump Trucks and Dozers.

At EXCON-2009, BEML has displayed, apart from the equipment for contractor segment, its latest equipment viz., BE-700, an innovative and competitive equipment with features in comparison to similar equipment manufactured world-over. BE-700 has certain special features like efficient hydraulic system, powerful & economical engine, effort-free operation, maximum working parameters, total reliability and durability, easy maintenance and operator comfort. This equipment is most useful in the mining and construction sector as well as contract mining sector.

BEML, the Rs. 3000 crore multi-technology and multi-location engineering company is aiming to cross a turnover of Rs. 4000 crore during the FY 2009-10.
